Joseph Nye Jr.	42,133	11	4,901	12
Slavoj Zizek	38,981	12	6,642	11

\* Refers only to living scholars as of December 2017. Complete data for 2018 are not yet available.

\*\* For frequently cited scholars with common names and several publications, searches brought up hundreds of citations and it was not always possible to distinguish every single citation to confirm whether it was authored by the required author or another with the same last name and initial. In such cases, it is possible that some citations were erroneously included or excluded. Where there was doubt, the preference was for inclusion rather than exclusion. Therefore, citations for these scholars are more likely to have been overestimated than underestimated. This provision applies especially to the results for these scholars.

\*\*\*The method used for these citation counts was developed under the guidance of specialists from Clarivate Analytics, the company that operates Web of Science and the SSCI.
